Team building of working groups of building:

The two way authentically safe living system we must intrergrret in real life

Background and upcomer

In the main time and bi side all the work we are working on with the new system how is based on a way that we had before based on the old dynasty of Egypt and the Maya civilizations combined with sophisticated modern Technic how are based on everything we have or use today. It doesn't matter how much me try to close our easy because the way of how we create already do with or without the software we use and every single programmable code we use in every languages we choice to build the application or any author command controlled platforms how gives a signal or makes a decision of starting a common reaction of start one action or tasks. Are in the same millisecond of the same time a simple single trigger a way of being our biggest and most dangerous enemy how will give the answer back instead to do something completely different instruction and when that day comes I can promise everyone how not have noticed that it is not that faraway of being nothing but the truth. And that reality is not going to happen but that is the reason of way this project is opening and it is the or had that in mind complexity hard one to have a battle way of every single block string we code software all known elements for example electrics and renewal fuels how can be driven with powerful engines in all sices and models we want to have?, that's not the problem and the only thing that I am say to every one how are willing to listen? Im not traing to do this or anything else for me and my on cause or will! I only doing this of one singel reson and there is no outhter reason or purpus accept this: I have walked to may steps in a way that many people never going to understand or would probley not believe that its true and that is not hard for me to understand! Because I didn't do that for a long time to. But if I say like this "If someone of all of you can find as mush as little as just one thing that you can point out for me and the hole world. If someone have that felling or things that is my meaning and my reason in something I have said or written done in all of my work and the effords it brings only for doing a such stupied thing? Whit out mashing that sacrifices .. something are going to hear me say or wright about?? Then I what however it is the president thing in all I that I have been writhing have and now I'm completely honest to all of you when I am say someone I really act like is that important to me if someone believe or not? and right know I not going to tell more about how I did that? Or what can is special or different I mean say right now has nothing to do with me or what chois or how I want the world to be in a mayby closer future than we have accepting us and that's what I would explain to you. The only thing we must think off is that every single car, airplane both Yes every one off the vehicles we builds must of it has to work in both lessness and a two way the fact system we had on this planet for long time ago (nearly 3000 years) and all work with all what that means to preparing to build up an independent and much stronger way of living (I have been collecting and learn written for 20 years defend our city's and all basics we need from industrial or manufactured tools and equipment you need beside the hand based weapons every man and women in every family are going to have in case of emergency as well as major "disaster preparedness" in school as well as every growing up is going to live in a way of thinking that we "live and we fight to protect our self, families and the entire human race from other spices because we are in somehow and in the same way living under the same basic law what is Universal as classes of self-defense, psychics in

close up combats in the same way as we have HLR courses today in the house warrior sets of an attack from, virus or all other possible treatment future get this back Keep on developing the current system we use today in our society by over-watch and locating new or unknown threats in the real-life in all areas of public environments and the digital-based data everything is based on this today and almost everything we knows about of living are stored or saved in the same system and almost everything are also contented to what we are doing and completely all ways of living are controlled or are depending on the same digital build structure that single the same at work, in every home or public areas our and need for living every day and also extremely dependent on the fact that it work and is safely integrated to all transportation verticals we use to move faster than it is to "of taking a walk" a basic ordinary bicycle satellite, bank or trading in something that we not controls any longer. at it means that this current system that the hole mankind is completely exposed and vin the hands of humanity all parts of the modern humanity infrastructural humanity our integrated Civilizations and society system that is connected on planet Ether, detecting new or command issues defaults in -

Civilization sectors - transport/road railway traffic-system, economic, communicate & voice or phone/message, healthcare/private homes care
